INFRONEER Group Sustainability Procurement Policy and Guidelines

We have established the “INFRONEER Group Sustainability Procurement Policy” and “INFRONEER Group Sustainability Procurement Guidelines”.

This Procurement Policy was formulated with the aim of realizing sustainability and creating added value throughout the supply chain by building good partnerships with direct and indirect suppliers based on mutual respect for each other's position.

In line with this Procurement Policy, we have also created this guideline to request our suppliers to comply with the conventional quality, performance, price, delivery time, and other sustainability factors such as environment, labor environment, and human rights in cooperation with our group companies.

Please refer to the link below for the details of the Policy and Guidelines.
